

Anomali

ARTIFICIAL INTELLIGENCE

Who we are

Anomali arms security teams with highly optimized threat intelligence, powered by machine learning. Anomali arms security teams with the cyber threat intelligence necessary to identify and prioritize critical threats to your organization. Organizations rely on the Anomali Threat Platform to detect threats, understand the adversary, and respond effectively.

Our advantage

Anomali can share threats across organisations and enterprises. Their threat intelligence sharing platform is powered by Machine Learning(ML) and can cross reference day zero threats. Offers a Security Operations Centres are support tool to feed in information from your systems then ML will categorize that and based on the entire community it identifies the threat and shares back with the community. Also allows customers to set up sharing circles of trust.

How does our solution work?

Anomali helps organizations stay ahead with a proactive security posture. Anomali arms security teams with the cyber threat intelligence to identify and prioritize critical threats.

Collect intelligence from, OSINT, STIX/TAXII, ISACs
Evaluate/purchase intelligence feeds via Anomali APP Store
Apply ML optimized threat intelligence and reduce false positives

What are people saying?

It is challenging for customers to identify threats, and improve their cyber defence capabilities. We sought out Anomali to help organisations in South Africa.
