Partnering with the extraordinary

Who we are

Springboard is an online learning platform that prepares students for the tech industry's most in-demand careers with comprehensive, mentor-led online programs in software engineering, data science, machine learning, UI/UX design, and more.

We act as a support system, coach, and cheerleader for working professionals who are ready to level-up or make a major career shift.

Our one-size-fits-one approach brings students together with real people, expert mentors, career coaches, and student advisors, who provide an individualised and personalised learning experience.

Together with a bleeding-edge curriculum and a continuous support network, our students are able to fuel their progress and pursue their dreams.

Our advantage

Springboard is purpose-built for online learning. Our programs are designed to keep pace with the fast-moving tech ecosystem, and our graduates learn to approach their work with the same level of adaptability and growth.

At Springboard, we also believe mentors provide the bridge for students to become the industry's new trailblazers. Mentors provide valuable guidance, coaching, and support to help keep Springboard students motivated.

Finally, we recognize that not everyone has the means to transform their lives, no matter how much they wish to. That's why we offer scholarships to veterans, women in the tech industry, and underserved communities.

How does our solution work?

Springboard provides multiple online programs and bootcamps at various skill levels. All Springboard courses are 100% online, remote, and self-paced.

Students get access to a unique community of industry mentors, thought leaders, and alumni, who are on hand to offer insights, networking opportunities, and support throughout our programs and well past graduation.

Springboard's career services team supports students in their job search, helping prepare for interviews and networking, and facilitates their transition in the tech industry.

In addition, all graduates benefit from an extensive support network encompassing career services, 1:1 career coaching, networking tips, resume assistance, interview prep, and salary negotiation.

What are people saying?

If you actually want to build a functional, real skill set, and you're willing to do the hard work, then there's not a better option out there than Springboard. Through Springboard, I was able to quickly learn about UX, get some practical experience, and have mentoring each step of the way.

- Laura Johnston, Executive Creative Director, Geometry Global

Where I needed the most help was in building a portfolio, Springboard offered exactly what I wanted. It's self-paced, so I could move as quickly as I wanted. And having a mentor meant someone who could help me navigate how I should enter this new field.

- Timothy Li, Designer, TripElephant

I spent over a year trying to learn on my own. My strategy was to study statistics and machine learning through online courses. But with all the options out there, it seemed overwhelming, until I found Springboard. I loved that they had curated the best content for me, so I didn't have to wade through everything myself.

- Sara Weinstein, Data Scientist, Boeing
